Core Competencies

Systems Engineering & Integration Services

- Research and Development Services
- Engineering, Systems Engineering and Process Engineering Services
- Modeling, Simulation, and Analysis Services
- Systems Design Documentation and Technical Data Services
- Reliability, Maintainability, and Availability Services
- Human Factors, Performance, and Usability Engineering Services
- Configuration Management Services
- Quality Assurance Support Services
- Interoperability, Test & Evaluation, and Prototyping Services
- Measurement Facilities, Instrumentation and Monitoring Services

Information Technology Services

- Software Engineering, Development, and Programming Services
- Infrastructure and Network Services
- Information Systems Development Services
- Information Technology Services

Information Assurance & Cyber Security Services

- Information Assurance
- Cyber Security Services

Cloud Services

- Cloud Engineering and Consulting Services
- Cloud Operations and Maintenance Services
- Data Science / Big Data Analytics Services
- Managed Services

Business Services

- Consulting Services
- Program Management Support
- Logistics Support
- Supply and Provisioning Support
- Training Support
- Functional and Administrative Support
- Audio Visual & Multimedia Support

Products

- End Point Cyber Security Detection and Response Solution
- Enterprise Application Performance Monitoring Solution
- Literacy, Accessibility & Dyslexia Software Solution
- Platform as a Service Integrated Business Solution
- Internet of Things Traceability as a Service Logistics Solution
- Enterprise Digital Experience Monitoring Solution

Instead of relying on signatures, Carbon Black combines static and dynamic code analysis to detect malicious code. Legacy and machine learning AV are not enough to stop new and evolving threats. Cb Defense's streaming prevention stops all types of attacks by intercepting malicious activity before it causes harm. Cb Defense is certified to replace antivirus, meet PCI and HIPAA compliance requirements, and protect information in the cloud. That's why Cb Defense is trusted by leading analysts and industry associations. Cb Defense is proven to replace AV with better protection, increased visibility, and an easy experience that keeps users productive. Backed by world-class threat research and customer service, our customers know their security comes first. Thousands of experts from top-performing security teams, leading incident response firms, and businesses of all sizes regularly contribute intelligence and insight that makes every Cb Defense customer safer.

Dynatrace provides the most comprehensive set of monitoring and analytics capabilities, 100% gap-free data, and the broadest technology coverage. Use a single platform to analyze application performance throughout your application's full stack, down to each individual transaction across all layers and technologies. Full stack monitoring provides full insights into customer experience, application performance management, and infrastructure monitoring—including servers, containers, and cloud—end-to-end with no blind spots.

EDUCATION Literacy is every student's passport to academic achievement. Our award-winning assistive technology solutions for reading, writing and language learning are used daily by students and educators worldwide.

WORK From blue-chip companies to public sector and non-profit organizations, our award-winning assistive technology solutions help millions of people in the workplace read, write and communicate with greater confidence.

WHO WE HELP Our assistive learning solutions help people of all ages achieve their potential by understanding, reading, writing and communicating with greater ease and confidence. Our products are great for people with learning difficulties, dyslexia or visual impairments, English Language Learners (ELL) and those learning English as a Second Language (ESL).

Engage diverse and dispersed communities -Whether you work with ten people or ten thousand, our cloud solution provides access to your entire community through role based portals.

Automate organizational processes - Take complete control of how your processes are automated; modify your system whenever you need as your organization evolves.

Track your information, your way - Take advantage of SmartSimple flexibility that gives you the freedom to create, gather, process and report on information in any format you choose. Provide transparency - Share, track and export your information your way.

TRACEABILITY AS A SERVICE

...with real-time logistics intelligence

Traceability as a Service (TaaS™) solutions have substantially improved production efficiencies in manufacturing, inventory management, manufacturing and logistics. Real-time visibility allows customers to be in compliance with US&C Government and Department of Defense (DoD) standards.

This IoT platform transforms existing operations in to Smart Infrastructures™ integrating sensors and IoT smart devices. They have invented the Enterprise Application and Sensor Engine (EASE-V8™) for delivering IoT business applications through a distributed IoT Information Bus that extends existing ERP systems with real-time operational intelligence.

TaaS powerful EASE-V8™ IoT middleware was designed to integrate and encapsulate new devices and protocols to enhance operations. These devices are made available to IoT services (Edgelets™) as normalized JSON objects, removing any requirement for application developers to be overwhelmed with the new smart devices
