

CAPABILITY STATEMENT

At eTRANSERVICES, we are a premier global provider of Systems Engineering, Information Technology, cybersecurity, Cloud, and Business Services. We anticipate and adapt to a changing world by transforming advanced technologies into value for our customers through our professional solutions, services, and process-driven workforce. We enable all levels of government and commercial organizations that desire predictable outcomes and superior services. We do this by implementing a franchised methodology that provides repeatable processes, reduces costs, increases efficiencies, and utilizes the highest industry standards to enable our customers’ success.

CORE COMPETENCIES

SYSTEMS ENGINEERING SERVICES

- Research & Development
- Modeling, Simulation, & Analysis
- Systems Design Documentation & Technical Data
- Reliability, Maintainability, & Availability
- Human Factors, Performance, & Usability Engineering
- Configuration Management & Quality Assurance Support
- Interoperability, Test & Evaluation, & Prototyping

INFORMATION TECHNOLOGY

- Software Engineering, Development, & Programming
- Infrastructure & Network
- Information Systems & Development

CYBERSECURITY SERVICES

- High Value Asset Risk & Vulnerability Assessments
- Penetration Testing, Incident Response, & Cyber Hunt
- Risk Management Framework Documentation

CLOUD SERVICES

- Cloud Engineering & Consulting
- Cloud Operations & Maintenance Services
- Data Science / Data Engineering / Big Data Analytics
- UDPaaS No Code / Low Code Capable Platform (Products & Services)

BUSINESS SERVICES

- Business Process Re-engineering & Process Improvement
- Program Management Office & Logistics Support
- Facilities & Janitorial
- Professional Training & Administrative Support
- Audio Visual & Multimedia Support

NAICS CODES

511210, 518210, 541330, 541511, 541512, 541513, 541519, 541611, 541990

CERTIFICATIONS

SBA 8(A)  **SDVOSB**
Participant Service Disabled Veteran Owned Small Business

PROCUREMENT VEHICLES

PRIME VEHICLES: GSA 8(a) STARS III, FAA eFAST, Seaport NxG, NIWC IDIQ (8a)

GSA VEHICLES: GSA MAS (GS-35F-421BA)

PARTNER VEHICLES: NIH CIO-SP3 SB, RS3, VA T4NG, DTIC IAC (Large/SB) SEC ONE OIT, VETS 2

DCAA & DCMA Cost Accounting System Approved

PAST PERFORMANCES

DEPARTMENT OF DEFENSE: Air Force, Army, DISA Thunderdome, Navy Dahlgren, USSTRATCOM

CIVILIAN AGENCIES: VA, USDA

INTELLIGENCE: DIA | MCIA

STATE & LOCAL GOVERNMENTS: Washington State, Delaware, Virginia, Colorado, Michigan, Tennessee

OUR PRODUCTS

Universal Design Platform as a Service (UDPaaS) is a cloud-hosted platform used to design human-centered applications – solutions developed by involving the human perspective in all steps of the design process. UDPaaS enables application designs that optimize business processes in any market to be transformed into applications in weeks or months with virtually no custom coding. We combine collaboration with end-users, customized design views, unified data, machine learning, web-services, and dynamic dashboards into enterprise-grade applications that can be securely accessed anywhere with internet access on most devices. This innovative software platform helps organizations transform Clients' visions into reality while maximizing security – the platform uses field-level security, version control, auditing, logging and user/role-based access control to ensure client data is protected.

SmartSimple Cloud is the latest generation of our cloud-based automation and collaboration platform that powers all our solutions. Its a next-generation technology builds on our nearly two-decades of empowering organizations to solve their complex process challenges. SmartSimple Cloud manages a key third aspect that neither ERP nor CRM systems are intended to manage, an organization's complex operational process. Through configuration, SmartSimple Cloud has the flexibility to manage any unique process, while seamlessly connecting your ERP and CRM systems. As one, SmartSimple Cloud enables organizations to optimize all aspects of their tech stack, from their ERP system, CRM system, to everything in-between. SmartSimple Cloud is configuration-based technology that enables you to endlessly tailor the platform to meet your current and future needs as they evolve. Your entire organization will benefit from a highly personalized, moldable solution that avoids the costliness and riskiness of maintaining customized software.

Versa Networks industry-leading SD-WAN offers an extensive list of capabilities including sub-second packet steering across multiple WAN interface, packet loss reduction through services such as FEC, packet replication, and poor performing link avoidance. Additional features include encrypted and unencrypted overlays with MPLS/GRE or VXLAN, SD-WAN controller, WAN circuit support, full mesh topology, and hub-spoke topology, dynamic IPSec overlays, direct internet access, and a perfect marriage of HTTP/S Proxy. Versa secure SD-WAN technology differentiates from pure play SD-WAN vendors by implementing capabilities that enable a seamless SASE architecture. This includes visibility into traffic traversing the network between users, applications, and devices regardless of their location.

UiPath has a vision to deliver the Fully Automated Enterprise, one where companies use automation to unlock their greatest potential. UiPath offers an end-to-end. Platform for automation, combining the leading Robotic Process Automation (RPA) solution with full suite of capabilities that enable every organization to rapidly scale digital business operations. Continual innovation makes UiPath a great automation platform for today and the right automation foundation for tomorrow. eTRANSERVICES' employees are trained and certified in the entire UiPath Suite, including Process Mining, Document Understanding, AI Center, Action Center, Orchestrator, and Insights.

EDUCATION Literacy is every student's passport to academic achievement. Our award-winning assistive technology solutions for reading, writing and language learning is used daily by students and educators worldwide. **WORK** From blue-chip companies to public sector and non-profit organizations, our award-winning assistive technology solutions help millions of people in the workplace read, write, and communicate with confidence. **WHO WE HELP** Our assistive learning solutions help people of all ages achieve their maximum potential by understanding, reading, writing, and communicating with greater ease and confidence. Our products are great for people with learning difficulties, dyslexia or visual impairments, English Language Learners (ELL) and those learning English as a Second Language (ESL).

Carbon Black. Instead of relying on signatures, **Carbon Black**

combines static and dynamic code analysis to detect malicious code. Legacy and machine learning AV are not enough to stop new and evolving threats. Carbon Black Defense's streaming prevention stops all types of attacks by intercepting malicious activity before it causes harm. Carbon Black Defense is certified to replace antivirus, meet PCI and HIPAA compliance requirements, and protect information in the cloud. That's why Carbon Black Defense is trusted by leading analysts and industry associations. Carbon Black Defense is proven to replace AV with better protection, increased visibility, and an easy experience that keeps users productive. Backed by world-class threat research and Client's service, our clients know their security comes first. Thousands of experts from top-performing security teams, leading incident response firms, and businesses of all sizes regularly contribute intelligence and insight that makes every Carbon Black Defense Clients more secure.

Rapid7 is advancing security with visibility, analytics, and automation delivered through our Insight cloud. Its solutions simplify the complex, allowing security teams to work more effectively with IT and development to reduce vulnerabilities, monitor for malicious behavior, investigate and shut down attacks, and automate routine tasks. Customers around the globe rely on Rapid7 technology, services, and research to improve security outcomes and securely advance their organizations.
